

Water Nexus: Saline when possible, fresh when needed

Huub Rijnaarts, Koen Wetser

Dow Terneuzen

Our future agro/industrial and economic development

What do we **NEED**?

- Long-term sustainable water supply
- Through Integrated water management: connecting local, regional, continental scale
 - Good knowledge on water demand and supply
 - Good technologies
 - Good concepts

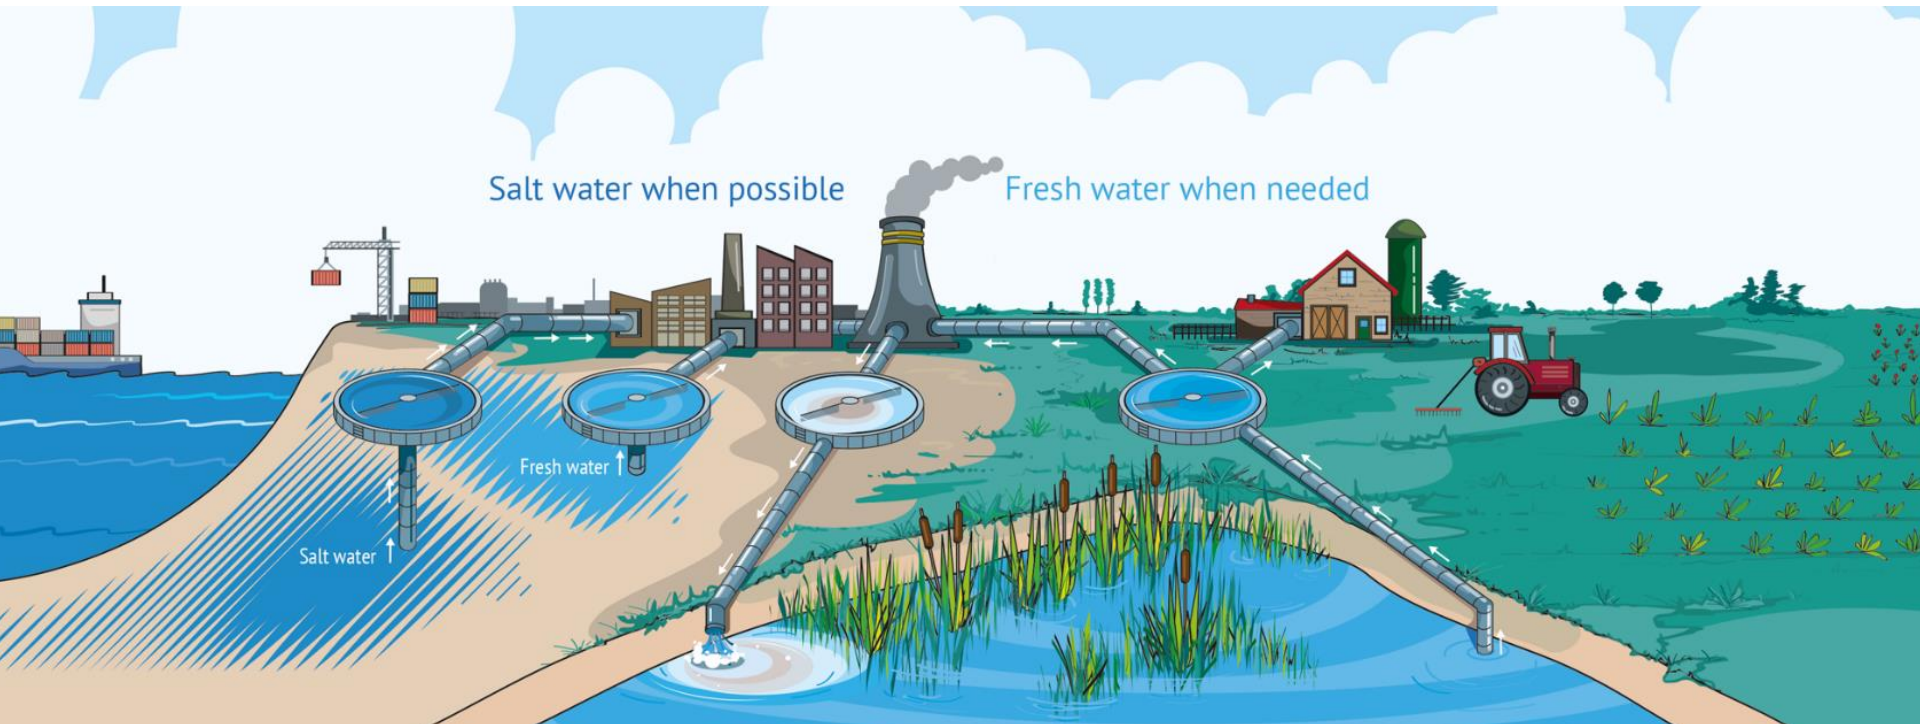

Integral Solution
for water
scarcity problems

WATER NEXUS

Saline when possible
Fresh when needed

Water Nexus

Today

Two WN projects related to drought and smarter management of available fresh water:

- Operational management of polders to save fresh water
 - Gu Oude Essink
- Smart drainage based on weather predictions
 - Daniël van de Craats
