

Ecologisch succesvolle maatregelen: wat weten we en hoe verder?

Piet Verdonschot (piet.verdonschot@wur.nl)

Webinar 13 januari 2022

Wie zitten er vandaag in de “zaal”?

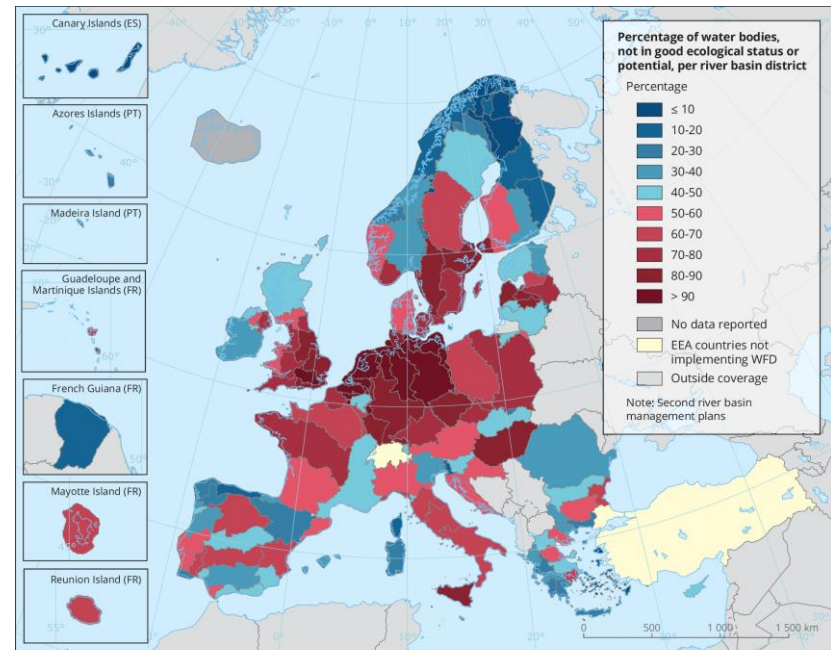

Het signaal: NL oppervlaktewater niet robuust noch duurzaam

Macrofauna

van Gaalen et al. 2020

Reference data: ©ESRI | ©EuroGeographics

Percentage of water bodies, not in good ecological status or potential, per river basic district

Both in 2009 and in 2015, only **0.4 percent** of Dutch surface waters complied with the standards for good ecological status according to the Water Framework Directive.

Doel: Verzamelen kennis gericht op begrip van systeem functioneren en effectiviteit van maatregelen
